

Environmental Policy

Introduction

3Way is aware that to succeed we must operate in a manner that produces the most sustainable results. Becoming “environmentally friendly” is not just about assessing our chemical use and changing products to “green alternatives”. Our EMS (environmental management system) ISO 14001 requires that we monitor the overall impact of our business activities and ensure that they continuously improve.

3Way requirements

3Way must strive for sustainability by reducing consumption and always source effective products and services, using them efficiently to minimise all waste and by products.

- ☞ We define the products to be used and ensure that they perform to the required standards.
- ☞ Monitor tasks to ensure that they are carried out in an effective manner and completed on the first occasion.
- ☞ Use new systems and technologies, such as micro fibre cloths, to reduce our environmental impact.
- ☞ Use effective products by trained individuals to the manufacturer's guidelines.
- ☞ Service equipment regularly.

Environmental & sustainability policy

3 Way Cleaning acknowledges that the cleaning service provided to their clients must be carried out within an environmental management system, with the overall aim of continual reduction in environmental impacts and continued improvement in environmental performance.

It is our policy to:

- ☞ Minimise waste, and consumption of resources (materials, fuel, water and energy) and ensure that unavoidable waste is, where possible, recycled or disposed of responsibly.
- ☞ Foster a sense of responsibility for the environment amongst employees by the provision of information and training.
- ☞ Assess, monitor and where possible reduce the impact of our activities on the local and general environment.
- ☞ Take account of the environmental impact of all raw materials, packaging and processes, and wherever possible take steps to minimize this through strategic evaluation and planning.
- ☞ Establish and monitor environmental objectives and targets; identify deviations from the stated policy, and implement appropriate corrective action.
- ☞ Maintain effective systems to prevent pollution.
- ☞ Advise customers and other interested parties, where appropriate, on the best environmental practices associated with the delivery of our services.
- ☞ Ensure that all members of staff and our suppliers act in accordance with this policy and our environmental management system.
- ☞ Strive to continually improve our environmental performance and prevent pollution.
- ☞ Comply with all relevant Environmental Legislation.
